

# «Babylon»

The set consists of 53 wooden blocks. Before the game “18-storey” tower needs to be build. Every “floor” consists of 3 blocks laid close parallel to each other. Blocks of each next “floor” are laid perpendicular to the blocks of the previous floor.

The players take turns in removing one block at a time from the middle of the tower and than placing it back on its top. One cannot remove blocks from two uppermost “floors”. The players can only use one hand for repositioning the blocks.

The task can be complicated by rolling the dice and having to remove a particular numbered block matching the dice numbers.
